

Are you from Africa?

Do you want to break down stereotypes?

Have you ever felt frustrated with how the media represents refugees' experience?

Do you remember something fun you experienced as a child?

The Unheard Stories

We created this project to change the way people view the world, and to challenge untruthful stereotypes they make about certain people or a particular group, especially the way they view refugees and immigrants who are from Africa. The purpose of this project is to tell fun and beautiful narratives about refugees and immigrants from Africa. We want our friends and community to know that people who live in Africa don't only experience War. They also have beautiful stories that they would want people to know about.

Would you like to be a part of this project?

We need other immigrants or refugees from Africa who want to share their stories and who want to interview others! Eventually we will be sharing these stories with the larger Winooski community.

Come join us!

★ You could even use this for capstone projects.
